

WhatsApp chatbots are revolutionizing Healthcare!

Hi, I'm Health-bot. Your Virtual Assistant.
How can I help you today? 🗓️

Hello

Please select from among the options below.

Select language

Schedule an appointment

Cancel an appointment

Call an agent

Schedule an appointment

Assessing symptoms

Your patients can now chat with a personalized healthcare chatbot on WhatsApp to self-report their symptoms and get a diagnosis

Let me know what kind of throat infection do you have

Pain

Irritation

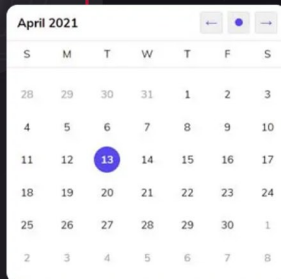

Inflammation

Booking appointments

With a WhatsApp chatbot, your patients can book appointments for consultations and check-ups. You can integrate your healthcare chatbot with Google Calendar to make the process simpler!

Linda, on which date you want to schedule an appointment

Test reports

You can use your bot to send test reports over to your patients so that they don't need to physically collect them

Hey John, you can download your medical report here

blood_test_report
10kb - pdf

Making payments

Ease the pain of waiting in long lines by simply allowing patients to make their payments directly over your WhatsApp chatbot

Great! Choose a payment option and confirm your appointment.

- Debit Card
- Credit Card
- Cash

Medicine Reminders

Patients could receive reminders to take their medications via a WhatsApp chatbot, ensuring that they do so on time, without forgetting

Hey Alex, this is reminder for
your 7:00pm Medication
(Metoprolol & Levothyroxine)

Remind later

Thanks
